

KUBERNETES IS GREAT, BUT LET'S ADD SOME

STANDARD TOOLING

DATADOG AGENT

- ▶ Metrics
- ▶ Logs

```
datadog:
  version: 1.0.1
  repository: stable
  values:
    rbac.create: "true"
    daemonset.updateStrategy: RollingUpdate
    daemonset.tolerations[0].key: node-role.kubernetes.io/master
    daemonset.tolerations[0].effect: NoSchedule
    kube-state-metrics.rbac.create: "true"
    kubeStateMetrics.enabled: "true"
  datadog:
    resources:
      requests:
        cpu: 100m
        memory: 256Mi
      limits:
        cpu: 200m
        memory: 512Mi
    apiKey: "${DATADOG_API_KEY}"
    leaderElection: "true"
    collectEvents: "true"
```
