

sudermanjr

THEN WE HAND THIS

```
replicaCount: 1
image:
  repository: nginx
  tag: stable
  pullPolicy: IfNotPresent
nameOverride: ""
fullNameOverride: ""
service:
  type: ClusterIP
  port: 80
ingress:
  enabled: true
  annotations:
    kubernetes.io/ingress.class: nginx
  path: /
  hosts:
    - example.local
  tls: []
resources:
  limits:
    cpu: 100m
    memory: 128Mi
  requests:
    cpu: 100m
    memory: 128Mi

nodeSelector: {}
tolerations: []
affinity: {}
```

THEN WE HAD THIS

```
replicaCount: 1
image:
  repository: nginx
  tag: stable
  pullPolicy: IfNotPresent
nameOverride: ""
fullnameOverride: ""
service:
  type: ClusterIP
  port: 80
ingress:
  enabled: true
  annotations:
    kubernetes.io/ingress.class: nginx
  path: /
  hosts:
    - example.local
  tls: []
resources:
  limits:
    cpu: 100m
    memory: 128Mi
  requests:
    cpu: 100m
    memory: 128Mi

nodeSelector: {}
tolerations: []
affinity: {}
```

IS THAT GOOD ENOUGH?

(12) Cluster* (10) Chart = (120) Helm Install
